Course #504

In-Use Off-Road Diesel Vehicle Regulation Training

The Air Resources Board has a regulation to reduce emissions from existing off-road diesel vehicles used in California in construction, mining, and other industries. The In-Use Off-Road Diesel Vehicle Regulation (Off-Road Regulation) requires fleet owners to report to ARB and label their off-road vehicles now, and then requires fleets to reduce the emissions from their older equipment beginning in 2014. Recently, ARB adopted amendments to the Off-Road Regulation that changed the compliance dates, administrative requirements, and also brought both engines on privately-owned, two-engine vehicles with certified auxiliary engines greater than 50 bhp into the Off-Road Regulation, except for street sweepers. Owners of off-road vehicles and/or two-engine vehicles (mentioned above) are strongly encouraged to attend this training.

Course #504 will provide an overview of the amended Off-Road Regulation, including the applicability of the regulation, requirements currently in effect, future compliance requirements, and will also include an overview of the Diesel Off-Road Online Reporting System (DOORS). ARB staff will also be available after the training to answer individual questions.

June 27, 2012
1:30 pm – 4:30 pm

**Air Resources Board
Training Room 5
1001 I Street
Sacramento, CA 95814**
