**MS504: In-Use Off-Road Diesel Vehicle Regulation**  
The Regulation for In-Use Off-Road Diesel-Fueled Fleets (Off-Road Regulation) requires fleet owners to report to CARB and label their off-road vehicles now, and then requires fleets to reduce the emissions from their older equipment beginning in 2014. This course provides detailed information to help fleet owners understand and comply with the Off-Road Regulation.

**MS505: Large Spark Ignition (LSI) Fleet Regulation**  
Do you own or operate fork lifts in California? The Air Resources Board is providing a unique training opportunity for fleets to learn about the requirements of the Large Spark Ignition (LSI) Fleet Regulation. The topics covered will include: reporting requirements, labeling requirements, and other changes that were added in Spring 2016. Owners of off-road vehicles with LSI engines are strongly encouraged to attend.

**MS521.8: CARB Diesel Truck Rules - Compliance Options and Reporting Requirements for 2018**  
Do you own, operate, or dispatch heavy-duty diesel trucks in or to California? Then you need to know that the California Air Resources Board (CARB) enforces a set of air pollution regulations affecting all types of heavy-duty diesel vehicles operating in the State. If your vehicles are NOT already compliant, you need to know what to do to be compliant for 2018. And if your vehicles ARE compliant, you still may need to report to remain compliant. This course gives you the information you need about how to comply with CARB diesel regulations and how to report to continue operating legally in 2018 and beyond.

**MS525: Compliance Overview: Truck & Bus Rule, Off-Road Regulation, and Portable Equipment**  
Course topics include: Truck and Bus Regulation, Off-Road Diesel Vehicle Regulation, Portable Equipment (PERP & ATCM)
