NRG Energy and eVgo

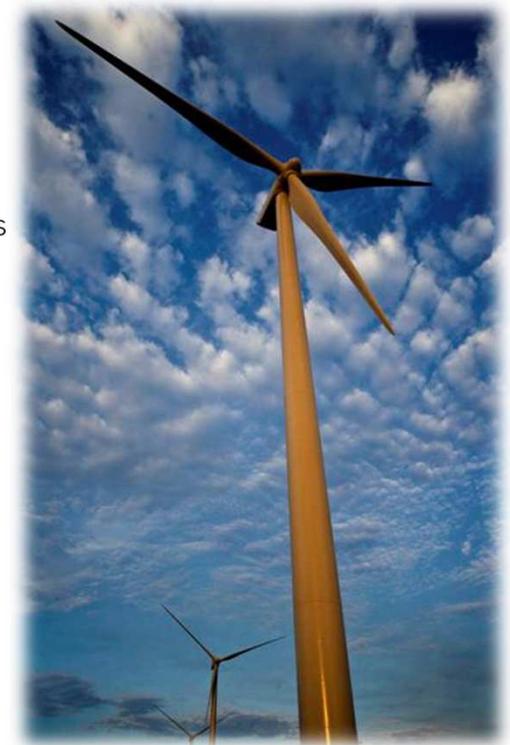

- NRG is the nation's largest competitive power generator (NYSE: NRG).
- One of the nation's largest private investors in solar power.
- Generating capacity of ~53,000 MW, enough for 46 million homes.
- eVgo is a wholly-owned subsidiary of NRG.

The power to change life.
The energy to make it happen.®

ENERGY PLUS 

The NRG eVgo ecosystem

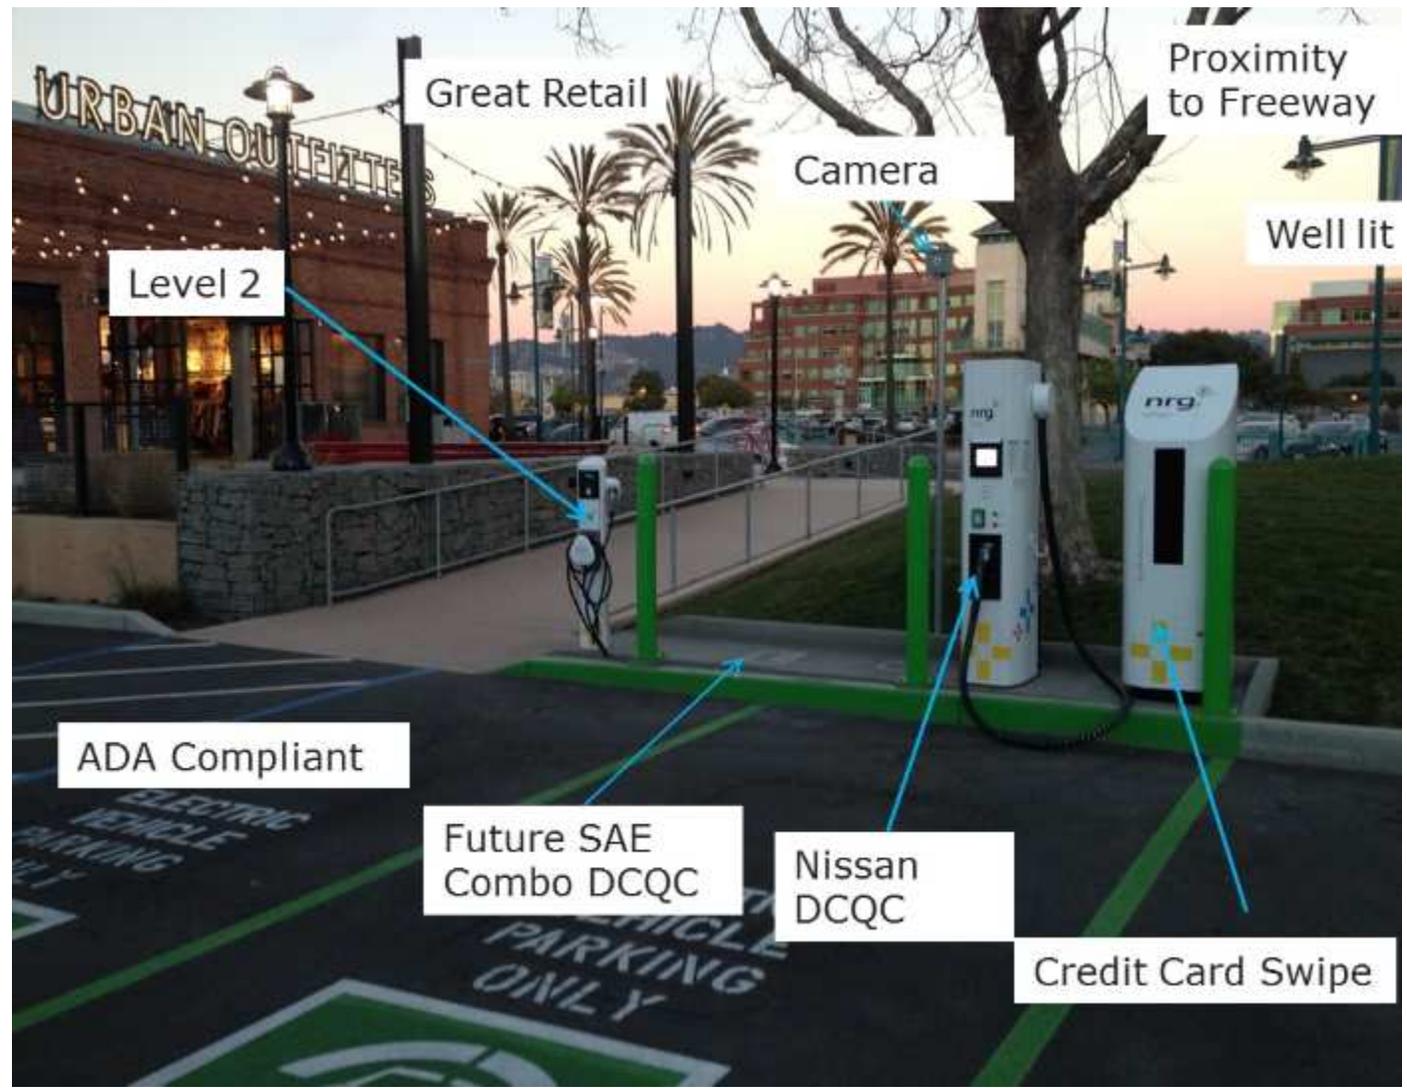

DCFC siting criteria

- Safe
- Easy freeway access
- Good retail engagement
- Visible
- Power availability close to utility service
- Not prime parking locations

Public Market - Emeryville

The opportunity

- NRG finances:
 - Equipment and installation costs
 - DCFC electricity costs for the life of the agreement
 - Operation and maintenance costs
- DCFC stations conveniently displayed in navigation systems and smart phone apps, e.g. PlugShare
- Current partners include Walgreens, Whole Foods, Kimco, Simon, Macerich and others

NRG eVgo in Bay Area

NRG eVgo in Los Angeles

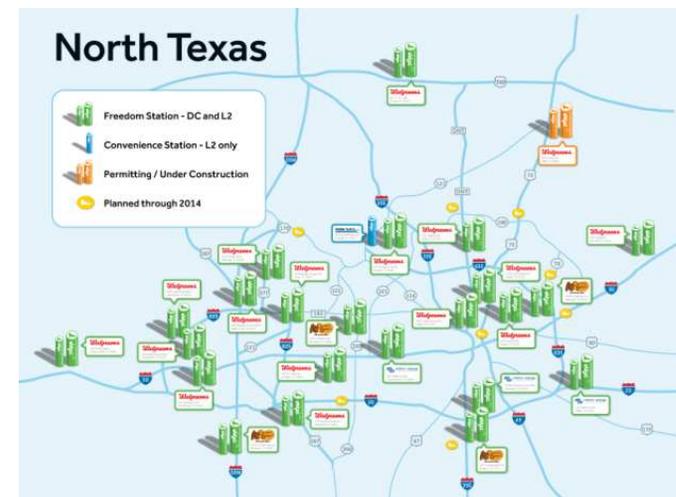

NRG eVgo in San Diego

Other regional networks

Whole Foods- Fremont

What does it take to be a leader?

"Currently the Westlake station averages 18 charges every day... Customers love the convenience of a charging station in a shopping center parking lot, and our retailers appreciate the addition of an on-site amenity that increases foot traffic..."
