November 2011
Advisory to Owners or Operators of Ocean-Going Vessels
Visiting California Ports

Changes to the Regulation on Fuel Sulfur and Other Operational Requirements for
Ocean-Going Vessels within California Waters and 24 Nautical Miles of the California
Baseline

The purpose of this advisory is to notify owners and operators of ocean-going vessels (OGVs)
of changes to the OGV Fuel Regulation. California's ARB will begin enforcement of the
changes to the rule on December 1, 2011. This advisory is only a summary of the
requirements and does not contain all the information that may be needed to comply with the
regulation. The regulations can be found at the following:

What are the changes to the fuel requirements?
The revised fuel requirements are summarized in Table 1 below. These fuel requirements apply
to ocean-going vessel main (propulsion) diesel engines, auxiliary diesel engines, and auxiliary
boilers.

<table>
<thead>
<tr>
<th>Fuel Requirement</th>
<th>Effective Date</th>
<th>Percent Sulfur Content Limit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Phase I</td>
<td>July 1, 2009¹</td>
<td>Marine gas oil (DMA) at or below 1.5% sulfur; or Marine diesel oil (DMB) at or below 0.5% sulfur</td>
</tr>
<tr>
<td></td>
<td>August 1, 2012²</td>
<td>Marine gas oil (DMA) at or below 1.0% sulfur; or Marine diesel oil (DMB) at or below 0.5% sulfur</td>
</tr>
<tr>
<td>Phase II</td>
<td>January 1, 2014³</td>
<td>Marine gas oil (DMA) or marine diesel oil (DMB) at or below 0.1% sulfur</td>
</tr>
</tbody>
</table>

¹. No change from the existing requirements.
². Marine gas oil sulfur limit reduced from 1.5% to 1%. No change in marine diesel oil limit.
³. Implementation delayed from 2012 to 2014.

How does the regulatory boundary change?
The regulatory boundary was expanded in Southern California to be consistent with the
Contiguous Zone. This new boundary includes the region 24 nautical miles (nm) from the
California shoreline, including 24 nm from the shoreline of the Channel Islands. There is also a
small region near the north end of the Santa Barbara Channel that was excluded from the
regulatory boundary to encourage vessels to use the established shipping lanes in the Channel.
The maps on the back of this advisory (Figures 1a – 1c) show the new regulatory boundary, as
well as the excluded region.

How can I get more information?*
