

California Air Resources Board
Marine Emissions Model
Instructions

May 2011

Requirements:

PC with Windows XP or greater
Microsoft Access 2003 or greater
At least 2 gigabytes hard drive space to run the model

To run the model:

1. Open Database
2. Select "Allow" or "Enable content" at the top of the screen.
Model will close, compact itself, and reopen.
3. Model will run faster if it runs from local hard drive rather than on a shared or network drive.

Options

- **Startup:** Introductory menu
- **Calculate:**
Estimate forecasted or base year emissions
- **Emissions:**
Open the most recently run emissions estimate. If not present, this will open the Calculate form instead.
- **Utilities**
 - **Version**
 - **Reset Tables**
Remove all temporary tables
 - **Fix References**
Use this only if you have problems with the Calculate form.
 - **Database Size**
Show the size of the database.
