

# Union Pacific Railroad Initial Draft Diesel PM Mitigation Plan for the LATC Railyard

California Environmental Protection Agency

---

**Air Resources Board**

March 5 , 2009

# Overview of Meeting

- ARB
  - Background on the UP LATC railyard health risk assessment
  - Process for the development of draft railyard mitigation plans
  - Explain existing locomotive and railyard regulations and agreements
- UP
  - Present initial draft railyard mitigation plan for UP LATC railyard
  - Discuss next steps to identify and discuss additional mitigation measures
- Community members encouraged to discuss and provide comments

# Background

- This effort is part of our commitment to address pollution impacts on communities
  - ARB Goods Movement Plan
    - Reduce risks by at least 85 percent by 2020
  - ARB/UP/BNSF Railroad Agreement
    - Reduce exposure to toxic diesel PM as quickly as possible
- Railyard health risk assessments
  - 18 railyard health risk assessments finalized by July 2008

# Railyard Mitigation Plan Process

- Railroads prepare initial draft railyard mitigation plans
  - Pursuant to the 2005 Agreement
- ARB provides technical review of draft plans
  - No ARB endorsement or approval of the draft plans
- Public meeting to discuss the draft plans and additional mitigation measures
- Revise the plans based on public comments
- UP finalizes the plans

# Existing Control Measures

- **Locomotives:**

- U.S. EPA Locomotive Emission Standards (1998)
- Statewide Railroad Agreement (2005)
- ARB Diesel Fuel Regulation of Intrastate Locomotives (2007)
- U.S. EPA Locomotive Emission Standards (2008)
- 1998 South Coast Locomotive NOx Fleet Average Agreement (2010)

- **Non-Locomotives:**

- ARB Cargo Handling Equipment Regulation (2007)
- ARB On-Road Heavy Duty Diesel Truck Regulation (2007)
- ARB Port and Intermodal Railyard Truck Regulation (2010)
- ARB ATCM for Transport Refrigeration (2010)
- ARB's Existing Private Truck Fleet Regulation (2010)
- ARB Tier-4 Nonroad Diesel-Fueled Emission Standards (2011-15)

# Statewide Locomotive DPM Emissions

# Distribution of 18 Railyard Diesel PM Emissions by Source Category

8 Intermodal Railyards DPM Emission Inventory (2005)

10 Classification Railyards DPM Emission Inventory (2005)

# Diesel PM Emissions from 18 Railyards

(Assumes average 80% reduction by 2020)

# UP LATC Railyard

# UP LATC Railyard Diesel PM Emissions

# Local and Regional Diesel PM Sources

(tons per year in 2005)

---

DPM Sources	Locomotives	Cargo Handling Equip.	On-Road Diesel Trucks	Off-Road Diesel Engines and Others	Total
South Coast Air Basin	300	5,000	2,000	5,000	7,800
Ports of LA/LB	20	170	40	1,570	1,800
UP LATC Railyard	3.2	2.7	1.0	0.5	7.3

---

# Health Risk Assessments: Estimating Health Effects

## Do:

- Provide an estimate of the amount of a pollutant in the air
- Predict or estimate the lifetime cancer risk and other health impacts – in this case for diesel PM

## Don't:

- Actually measure amount of diesel PM in the air
- Gather/use health data on local residents

# Estimated Potential Cancer Risk in 2005

# UP LATC Railyard

## Estimated Changes in DPM Cancer Risks (from existing measures)

- MICR (Maximum Individual Cancer Risk)

250  
↓  
~ 110 (by 2015)

- Exposed Population (> 10 in a million)

148,000  
↓  
~ 85,000 (by 2015)

# Summary

- The mitigation plan provides significant diesel PM emissions reductions from 2010 to 2015 and later
- Public health impacts are still high in 2015
- Need to accelerate and provide more diesel PM emission reductions

# ARB Technical Evaluation Document

## Strategies to Accelerate and Further Reduce Railyard and California Statewide Locomotive Emissions

- Separate and complementary effort
- Evaluate potential strategies based on the following criteria:
  - Technical feasibility
  - Potential emission reductions
  - Costs and cost-effectiveness
  - Not intended to address implementation issues (i.e., legal, regulatory, agreement, funding)
- Public comment period
  - December 22, 2008 – March 23, 2009
