Tactical Vehicle Letter

DEPARTMENT OF THE NAVY
COMMANDER NAVY REGION SOUTHWEST
937 NO. HARBOR DR.
SAN DIEGO, CALIFORNIA 92132-0058

IN REPLY REFER TO:
5090
Ser N45JRR.rr/0177
May 19, 2006

Clerk of the Board
Air Resources Board
1001 I Street, 23rd Floor
Sacramento, CA 95814-2828

Ref: (a) California Air Resources Board letter to DODREC 9 of November 24, 2004

RE: MILITARY TACTICAL VEHICLE AND EQUIPMENT TYPES MAINTAINED IN THE STATE OF CALIFORNIA

The purpose of this letter is to provide your office with updated information on the types of tactical vehicles and equipment that the Department of Defense (DOD) maintains in the State of California. In reference (a), you reaffirmed that military tactical equipment is exempt from emission control regulations. We appreciate your reassurance that these regulations will not negatively impact the performance and readiness of military tactical equipment. You also noted the requirement for DOD to provide your office with updates if DOD adds vehicle or equipment types to its inventory. Over the past year we have coordinated with our Services Working Group in California to obtain a current list of the military tactical vehicle and equipment types within the State. We are providing you with this list in order to update the equipment types covered by the national security exemption.

We have developed this list to satisfy statutory requirements contained in Title 13 of the California Code of Regulations (CCR). CCR Sections 1905 and 2420 exempt military tactical equipment from California Air Resources Board (CARB) rules that require pollution control devices. Both sections define military tactical equipment as:

> "Vehicles or equipment owned by the U.S. Department of Defense and/or the U.S. military services and used in combat, combat support, combat service support, tactical or relief operations, or training for such operations."

The list includes two primary mobile source classes: highway vehicles and off-road equipment with compression ignition engines. CCR Section 1905 exempts military tactical vehicles designed for use on roads and highways. The highway equipment on the attached list includes wheeled vehicles that must be capable of operating on JP-5 and JP-8 military fuel. This list also includes vehicles of commercial design that have been adapted for military use.

The majority of the list includes military tactical off-road types. Section 2420 exempts military tactical off-road vehicles and equipment with compression ignition engines. For purposes of this list, we have included all vehicle and equipment types that meet the definition listed in Section 2420, where off-road equipment is defined as equipment with:

> "Diesel or alternate fuel powered diesel cycle internal combustion engines 175 horsepower and greater, operated on or in any device by which any person or property may be propelled, moved or drawn upon a highway, but are primarily used off-highway. The engines are designed for powering construction, farm, mining, forestry and industrial implements and equipment. They are designed to be used in, but are not limited to use in, the following applications: agricultural tractors, backhoes, excavators, dozers, log skidders, trenchers, motor graders, portable generators and compressors and other miscellaneous applications…"

We appreciate the CARB's continued willingness to work with the DOD on national security issues such as these. I assure you that the DOD remains committed to compliance with the federal, state, and local air quality laws. Where feasible, future procurement of vehicles and equipment will be commercially available products that comply with California's new engine emissions standards. Our installations remain committed to using renewable alternative fuels and electric vehicles. We also continue to pursue advanced vehicles powered by hydrogen fuel cells in order to improve our Nation's environmental conservation objectives.

Thank you for the opportunity to provide comments on the subject proposed regulation. If you have any questions or concerns regarding these comments, my point of contact is Mr. Jose Casora. He can be reached at (619) 524-6502.

Sincerely,

RENE TREVINO
Executive Director
