This action completes the Board's adoption of the Low Carbon Fuel Standard by finalizing provisions relating to the carbon intensity of biodiesel and renewable diesel fuel made from soybeans that had been held back for further development and public comment and the addition of a severability clause to subarticle 7 that was omitted from the original proposal as the result of an oversight.

OAL approves this regulatory action pursuant to section 11349.3 of the Government Code. This regulatory action becomes effective on 4/15/2010.
