Project Title: Amendments to the Verification Procedure for In-Use Strategies to Control Emissions from Diesel Engines

Project Location: Statewide

Public Meeting Date: August 23, 2012; Agenda Item No. 12-5-3

Project Description: The verification procedure is used by ARB staff to evaluate diesel emission control strategies, and the proposed amendments to the Verification Procedure will not affect the stringency or the effectiveness of the existing verification process. The proposed amendments consist of minor administrative and procedural changes that will clarify definitions, modify recall provisions, and change monitoring, testing, and reporting requirements for Diesel Emission Control Strategy (DECS) manufacturers who voluntarily participate in the DECS verification process.
