

State of California  
AIR RESOURCES BOARD

**Addendum to the  
Final Statement of Reasons for Rulemaking**

**AMENDMENTS TO THE REGULATION FOR THE MANDATORY REPORTING  
OF GREENHOUSE GAS EMISSIONS**

Public Hearing Date: October 25, 2013  
Agenda Item No.: 13-9-8  
Addendum Prepared: December 30, 2013

---

ARB is submitting this addendum to the Final Statement of Reasons (FSOR) to OAL on December 30, 2013, for inclusion in OAL Regulatory Action File Number 2013-1118-02S.

To further explain the rationale for the 15-day notice changes related to section 95104(f), ARB staff believes it is vital to collect data related to annual increases or decreases of greater than five percent of greenhouse gas emissions to evaluate potential impacts from localized emissions. This information is necessary to support ARB's Cap-and-Trade Adaptive Management Program, which requires this level of reported data to conduct this evaluation. ARB staff had originally proposed that this reporting include data regarding criteria pollutants and toxic air contaminants, but removed those requirements during the 15-day changes in response to stakeholder comments.
