Amend title 17, California Code of Regulations, section 93000 to read as follows:

Note: The amendments are shown in underline to indicate additions and strikeout to indicate deletions.

§ 93000. Substances Identified as Toxic Air Contaminants.
Each substance identified in this section has been determined by the State Board to be a toxic air contaminant as defined in Health and Safety Code section 39655. If the State Board has found there to be a threshold exposure level below which no significant adverse health effects are anticipated from exposure to the identified substance, that level is specified as the threshold determination. If the Board has found there to be no threshold exposure level below which no significant adverse health effects are anticipated from exposure to the identified substance, a determination of “no threshold” is specified. If the Board has found that there is not sufficient available scientific evidence to support the identification of a threshold exposure level, the “Threshold” column specifies “None identified.”

Cadmium (metallic cadmium and cadmium compounds) None identified

Carbon Tetrachloride (CCl₄; tetrachloromethane) None identified

Ethylene Oxide (1,2-epoxyethane) None identified

Methylene Chloride (CH₂Cl₂; Dichloromethane) None identified

Trichloroethylene (CCl₂CHCl; Trichloroethene) None identified

Chloroform (CHCl₃) None identified

Vinyl chloride (C₂H₃Cl; Chloroethylene) None identified

Inorganic Arsenic None identified

Nickel (metallic nickel and inorganic nickel compounds) None identified

Perchloroethylene (C₂Cl₄; Tetrachloroethylene) None identified

Formaldehyde (HCHO) None identified

1,3-Butadiene (C₄H₆) None identified

Inorganic Lead None identified

Particulate Emissions from Diesel-Fueled Engines None identified

Environmental Tobacco Smoke None identified
