

## 5/27/04 RRAC Meeting Announcement

Dear Colleague:

The staff of the Air Resources Board invites you to a teleconference meeting at 1 PM on Thursday May 27, 2004. This meeting is a follow-up to our December 3, 2003 Reactivity Research Advisory Committee (RRAC) meeting at which the reactivity research needs in the area of architectural coatings were discussed. On May 27, 2004, in addition to providing updates on several reactivity-related projects, we'd like to focus our discussion on several tasks listed in the SCAQMD reactivity project, including selection of additional chemicals and availability study. Prior to the meeting, an agenda and relevant materials will be posted at <http://www.arb.ca.gov/research/reactivity/reactivitywhatsnew.htm>.

Dr. Carter will give a seminar on a recently completed ARB project, titled "Development and Evaluation of A Gas-Phase Atmospheric Mechanism for Low NOx Conditions," at 10 am on May 27, 2004 at ARB, which is posted at <http://www.arb.ca.gov/research/seminars/seminars.htm>. A toll number will be provided for the seminar if you'd like to participate by phone.

You are also welcome to attend both the seminar and the RRAC meeting in person. The seminar and the RRAC meeting will be held in the Training Room (1st floor) and the conference room 510, respectively.

Please let me know by March 24, 2004 if you can attend the seminar and/or RRAC meeting in person or by phone so I can make arrangements.

Sincerely,

Dongmin Luo, Ph.D., P.E.  
RRAC Coordinator
