Just in case you have not already corrected them, here are a few minor =
errors I noticed while reviewing the draft ozone standard staff report. =

Page 7-73: While the second paragraph says the Mountain Counties Air =
Basin [has data] only since 1987, the third paragraph refers to 1982, =
and the 22-year time period. The third paragraph should be changed to =
say 1987 and the 17-year time period. =20

Page 8-14: The lowest effect level appears to be somewhere between 75 =
and 110 ppb 1-hour ozone. This range corresponds roughly with an 8-hour =
concentration of 90 to 130 ppb. Shouldn't the 8-hour values be lower =
than the 1-hour, not higher?

Page 8-22: 0.33 to 0.48 ppm, Shouldn't these be 0.033 to 0.048 ppm?

Selnick.txt

Page 9-70: 9.6 Agricultural Crops - Summary This section is actually =
about forests.
