CROSS-SECTIONS

Ozone concentrations shown in parts per million (ppm), with location of maximum values indicated by shading.

Temperature soundings indicated by vertical series of numbers representing temperature in degrees F.

Winds shown by conventional wind arrows pointing in the direction the air is flowing. Speed (in mph) is indicated by the barbs and numbers at the end of the wind arrows.

Location of inversions indicated by dashed line.

Surface conditions for weather observing stations indicated by conventional weather symbols at bottom of cross-sections; surface wind speeds given in mph.
