Dear Dorthy Shimer,

I want to thank you and the team of experts that produced the draft report on indoor air quality. This type of study is long overdue. I read the Draft Executive Summary and found the information to be useful and well presented. I look forward to reading the final conclusions and recommendations of the study. Additionally, I hope the recommendations suggested in the study get the support and financing from the state legislature and health agencies that will make meaningful progress to protect the public (all of us) from exposure of unhealthy indoor air.

Best regards,

David Moralez
