

Tentative Outline of the ARB on the Ozone Weekend Effect

Executive Summary

Introduction / Background

Objectives of Report

Hypotheses

Technical Chapters on ARB Analyses:

Characterization of the Ozone Weekend Effect in California

Temporal Variations in Ozone and Ozone Precursors

Volatile Organic Compounds

Particulate Matter

Vehicular Activity Patterns

Other Ancillary Data (e.g., carryover, toxics)

Current Non-ARB Research Efforts

Overall Findings & Conclusions

Recommendations (including known gaps in information & data)

References (composite of all)

Appendices:

Compendium of previous analyses

Sections in Each Technical Chapter

Abstract (concise summary of purpose/objective of your analysis, approach/methodology used in the analysis, and the results/conclusions of the analysis)

Introduction (provide background, objective, data resources)

Methodology

Results

Conclusions (emphasis on validating or refuting each hypothesis - implications)

Recommendations (regarding future work)
