INFORMATION

The Scientific Review Panel (SRP/Panel) is charged with evaluating the risk assessments of substances proposed for identification as toxic air contaminants by the Air Resources Board (ARB) and the Department of Pesticide Regulation (DPR). In carrying out this responsibility, the SRP reviews the exposure and health assessment reports and underlying scientific data upon which the reports are based, which are prepared by the ARB, DPR, and the Office of Environmental Health Hazard Assessment (OEHHA) pursuant to the sections 39660-39661 of the Health and Safety Code and sections 14022-14023 of the Food and Agriculture Code. These reports are prepared for the purpose of determining whether a substance or pesticide should be identified as a toxic air contaminant. The SRP welcomes written comments or submissions from all parties regarding a report, and in order to assure adequate review, the SRP does not accept written or oral comments from the public at its meetings. Comments and submissions should be submitted in advance to the ARB pursuant to the requirements specified in the notice of availability of a report for public review. These submissions

are received and carefully reviewed and considered by the Panel members prior to the public meeting. For further information on the meeting or how to submit comments, please contact:
