00-04

Dear Mr. Holstein:

Approval of Environ Phase I Vapor Recovery Products

In a letter dated August 15, 1998 Environ requested California Air Resources Board (CARB) certification of the Environ VSV-1015F Vapor Shear Valve.

As required by the Certification Procedures for Gasoline Vapor Recovery Systems at Service Stations, the approvals of the three State agencies are a precondition to certification by the Air Resources Board. The appropriate letters of approval have been received and are listed as follows:

Department of Food and Agriculture,
Division of Measurement Standards
August 30, 1998

Department of Occupational Safety and Health
June 21, 1999

Department of Forestry and Fire Protection
Office of the State Fire Marshal
August 26, 1999

I find that the use of VSV-1015F Vapor Shear Valve, when installed in accordance with the manufacturer's instructions will not adversely affect the performance of vapor recovery systems on which they are installed. Therefore, this product is certified for use with Phase II vapor recovery systems.

Mr. Holstein
