Dear Mr. Riffle:

## Encore Series Dispenser for Balance Systems

This is in response to your request for California Air Resources Board (CARB) approval of the Encore series dispenser equipped with balance type vapor recovery systems. With this dispenser line, the balance system is available as a factory installed option and a field retrofit kit.

The applicable Encore dispenser designations for use with balance equipment are as follows:

<u>Model</u>	<u>Description</u>
NA0, NC0	1 Grade Multi-Hose
NA1, NC1	2 Grade Multi-Hose
NA2, NC2	3 Grade Multi-Hose
NA3, NC3	4 Grade Multi-Hose
NG0, NG2	3 Grade Single-Hose
NG1, NG3	4 Grade Single-Hose plus one
NJ0, NJ1	Multi-Hose Blender
NJ2, NJ3	Multi-Hose Blender plus one
NL# (#= 0-7)	X+1 Blender
NN# (#= 0-7)	X+0 Blender

As required by the Certification Procedures for Gasoline Vapor Recovery Systems at Service Stations, the approvals of the three State agencies are a precondition to certification by the Air Resources Board. The appropriate letters of approval have been received and are listed as follows:

Eric Riffle  
June 23, 2000  
Page 2

Department of Food and Agriculture,  
Division of Measurement Standards  
June 13, 2000

Department of Occupational Safety and Health  
January 12, 2000

Department of Forestry and Fire Protection  
Office of the State Fire Marshal  
December 13, 1999 GVRC 001:026:016

I find that the use of the Encore Series dispenser models identified above, when installed in accordance with the manufacturer's instructions, will not adversely affect the performance of balance type vapor recovery systems. Therefore, the Encore series dispenser is approved for use with CARB certified Phase II balance vapor recovery equipment. Upon installation, this configuration must demonstrate compliance with the pressure versus flow criteria.

If you have any questions or wish to discuss this matter further, please call Ranjit Bhullar at (916) 323-7370.

Sincerely,

***Signed Copy on File***
