The Goodyear Tire and Rubber Company
Post Office Box 579
Norfolk, NE 68701

#91-8

Dear Mr. Boche:

Approval of Green Goodyear Maxxim Coaxial Hose

The green version of the Maxxim coaxial hose has met all the requirements for California Air Resources Board (CARB) certification. Our testing of the subject hoses indicated that their operation and durability were satisfactory.

As required by the Air Resources Board certification and test procedures, you requested the approval of the Division of Occupational Health and Safety (DOSH), the Office of the State Fire Marshal (SFM) and the Department of Food and Agriculture, Division of Measurement Standards (DMS). The necessary approvals have been obtained from these agencies.

I find that the substitution of green Maxxim coaxial hose for the currently approved black Maxxim coaxial hose will not adversely affect the performance of gasoline vapor recovery systems. Therefore, both the green and black Goodyear Maxxim hoses are approved for use with Phase II gasoline vapor recovery systems in California. Any restrictions which currently apply to the use of or configuration of black Maxxim hoses will also apply to the green hoses.

If you have any questions, please call Laura McKinney, Associate Air Pollution Specialist, at (916) 327-1525 or Darrell Hawkins, Associate Air Resources Engineer, at (916) 324-7343.

Sincerely,

A handwritten signature in black ink, appearing to read "James J. Morgester".
