Springfield, MO 65808-3258

#92-1

Dear Mr. Berger:

Certification of Model 7574 Petroflex 2000 Hose Modifications

You requested certification of modifications to the Model 7574 coaxial hose assembly for use in Phase II vapor recovery systems. These revisions included a new venturi of brass, larger ID male inserts for the inner hose, and a change in the materials and construction of the inner hose. The hoses have undergone certification testing and the results of these tests were satisfactory.

As required by the Air Resources Board certification and test procedures, you requested the approval of the Division of Occupational Health and Safety, the Office of the State Fire Marshal and the Department of Food and Agriculture, Division of Measurement Standards. The necessary approvals have been obtained from these agencies.

I find that the use of the modified Dayco Model 7574 coaxial hose will not adversely affect existing vapor recovery systems. Therefore, the Dayco Model 7574 coaxial hose assembly is certified for use with Phase II gasoline vapor recovery systems.

If you have any questions, please call Laura McKinney, Associate Air Pollution Specialist, at (916) 327-1525 or Darrell Hawkins, Associate Air Resources Engineer, at (916) 324-7343.

Sincerely,

A handwritten signature in black ink, appearing to read "J. Morgester".

James J. Morgester, Chief
