4001 Weston Parkway
Cary, NC 27513

#92-10

Dear Mr. Parrish:

Approval of Emco Wheaton Spill Containers

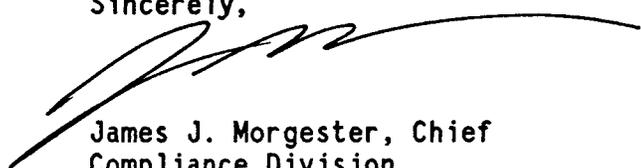

The Emco Wheaton model A1003 and model A1004 spill containers equipped with either the push type drain (PN 493144) or pull type drain (PN 493143) have met the requirements for California Air Resources Board (CARB) certification. Our evaluation of this equipment indicated that the operation and durability will be satisfactory.

As required by CARB certification and test procedures, you requested the approval of the Division of Occupational Health and Safety, the Office of the State Fire Marshal, and the Department of Food and Agriculture, Division of Measurement Standards. The necessary approvals have been obtained from these agencies.

I find that use of these Emco Wheaton spill containers will not adversely affect the performance of gasoline vapor recovery systems. Therefore, spill container models A1003 and A1004, equipped with either the 493144 or 493143 drain valves, are approved for use with Phase I gasoline vapor recovery systems in California.

If you have any questions, please call Darrell Hawkins at (916) 324-7343 or Laura McKinney at (916) 327-1525.

Sincerely,

James J. Morgester, Chief
