Larry Howell  
Pomeco Corp.  
3350 East 69th St.  
Long Beach, CA 90805

#92-12

Dear Mr. Howell:

Approval of Model 511 Spill Containers

The Pomeco Model 511 spill container assembly, which incorporates the OPW #1 container and drain, meets the requirements for California Air Resources Board (CARB) certification. Our evaluation of this equipment indicated that the operation and durability will be satisfactory.

The Model 511 assembly consists of a skirt and manhole cover with either one or two CARB certified OPW #1 spill containers. The skirt and manhole cover serve to protect the environment of the OPW #1 and do not otherwise affect the vapor recovery system. The OPW #1 received final CARB certification in April, 1992.

I find that use of the Pomeco Model 511 spill container assembly will not adversely affect the performance of gasoline vapor recovery systems. Therefore, The Model 511 assembly, equipped with certified OPW #1 spill containers, is approved for use with Phase I gasoline vapor recovery systems in California.

If you have any questions, please call Darrell Hawkins at (916) 324-7343 or Laura McKinney at (916) 327-1525.

Sincerely,

A handwritten signature in black ink, appearing to read "James J. Morgester".
