Dear Mr. Brown:

Certification of OPW 72 Coaxial Hose

You have requested Air Resources Board certification of the OPW 72 coaxial hose assembly. The OPW 72 coaxial hose assembly is manufactured by Vapor Systems Technology (VST) and was certified by the Air Resources Board on January 10, 1992.

The Air Resources Board requires the approval of the Division of Occupational Health and Safety, the Office of the State Fire Marshal and the Department of Food and Agriculture, Division of Measurement Standards. Confirmation was received that the VST coaxial hose assembly was acceptable and that there was no objection to the certification of this equipment.

Based on the fact that the OPW 72 is the same coaxial hose assembly which was certified as the VST coaxial hose assembly, I find that the use of the OPW coaxial hose assembly will not adversely affect the performance of gasoline vapor recovery systems on which they will be installed. Therefore, the OPW 72 coaxial hose assembly is approved for use with Phase II gasoline vapor recovery systems.

If you have any questions, please contact Christine McKenzie at (916) 324-7658 or Laura McKinney at (916) 327-1525.

Sincerely,

A handwritten signature in black ink, appearing to read "J. Morgester".
James J. Morgester, Chief
