#94-18

Dear Mr. Boche:

Approval of the Goodyear One Piece Spider Fitting

You requested California Air Resources Board (CARB) approval of the Goodyear one piece spider fitting for use with the Goodyear Maxxim Premier standard coaxial hose and Husky Model VI and VLX nozzles.

The Goodyear one piece spider fitting is used on the inner hose of the CARB certified Goodyear Maxxim Premier Hose (Approval Letter #93-3 dated February 4, 1993) and with the Husky Model VI or VLX nozzle. The Husky VI nozzle was CARB certified for use with the Amoco bootless vapor recovery system (Executive Order #G-70-118-AA signed on March 10, 1993). It incorporates a slurpie pickup tube which fits into the vapor path of the coaxial hose and serves the purpose of a liquid removal device. The Husky VLX nozzle was CARB certified for use with approved Phase II vapor recovery systems. (Executive Order #G-70-125-AA signed on March 16, 1993). The VLX also uses a slurpie pickup tube which fits into the coaxial hose's vapor path. The one piece spider locks onto the Maxxim Premier inner hose fitting and has guide pins which prevents the Husky slurpie tube from kinking when the nozzle is screwed on the hose.

As required by the Air Resources Board certification procedures, you requested the approval of the Division of Occupational Safety and Health, the Office of the State Fire Marshal and the Department of Food and Agriculture, Division of Measurement Standards. The necessary approvals have been obtained from these agencies.

I find that the use of the one piece spider fitting, when installed in accordance with the manufacturer's instructions, will not adversely affect the performance of vapor recovery systems on which it is installed. Therefore, the Goodyear one piece spider fitting is certified for use with CARB certified Goodyear Maxxim Premier standard coaxial hose and Husky Model VI or VLX nozzle assemblies.

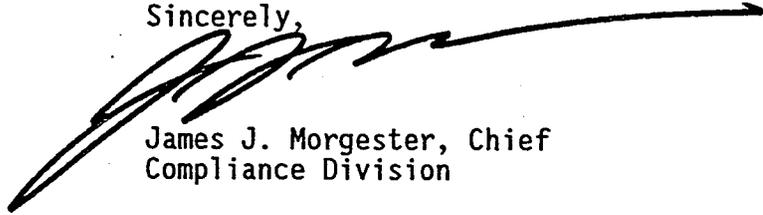

Mr. Craig Boche
