Dear Mr. Tucker:

Thomas Vapor Pump VR-0020/991202

This is in response to your request for California Air Resources Board (CARB) approval of the Thomas Vapor Pump VR-0020/991202. This pump is utilized for the MaxVac System, G-70-154 and the WayneVac System, G-70-153.

The previously approved pump was a sand-cast version VR-0020/991139. The VR-0020/991202 vapor pump represents a change in the sand-cast motor housing to a die-cast. As required by the certification Procedures for Gasoline Vapor Recovery Systems at Service Stations, the approvals of the three State agencies is a precondition to certification by the Air Resources Board. The appropriate letters of approval have been received. The Thomas Vapor Pump VR-0020/991202 is certified for use with the MaxVac and WayneVac gasoline vapor recovery systems.

If you have any questions or wish to discuss this matter further, please call Joe Guerrero at (916) 324-7343 or Laura McKinney at (916) 327-1525.

Sincerely,
