PUBLIC WORKSHOP TO DISCUSS ENHANCED VAPOR RECOVERY FOR ABOVE GROUND STORAGE TANKS

Dear Sir or Madam:

The Air Resources Board (ARB) is developing enhanced vapor recovery (EVR) standards for vapor recovery systems using aboveground storage tanks (ASTs). It is ARB's objective to apply EVR standards for AST vapor recovery systems through the rulemaking process. The goal of this workshop is to provide an update on ARB's current and future efforts towards adopting AST EVR standards. Specifically, the workshop will discuss the AST population inventory, emissions inventory, and the control technology test plan. The ARB invites your participation.

The workshop will be held at the following date, time and location:

DATE: Tuesday, June 7, 2005
TIME: 9:00 a.m. to 12:00 p.m.
LOCATION: California Air Resources Board
Monitoring and Laboratory Division
1927 13th Street, 1st Floor Conference Room
Sacramento, CA 95814

Arrangements have been made to provide teleconferencing at the workshop. The workshop agenda including teleconferencing information will be posted one week prior to the workshop on the aboveground storage tank vapor recovery web page at <http://www.arb.ca.gov/vapor/ast/ast.htm>.

This workshop location is accessible to persons with disabilities. If you have special accommodation or language needs, please contact Elizabeth Mongar at (916) 327-0900 as soon as possible. TTY/TDD/Speech-to-Speech users may dial 7-1-1 for the California Relay Service.

The workshop location is within three blocks of light rail. The enclosed map shows the location of a nearby vehicle parking facility. Please note street parking is generally limited to one-hour and is strictly enforced.

The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Website: <http://www.arb.ca.gov>.
