

**State of California
AIR RESOURCES BOARD**

EXECUTIVE ORDER G-70-215-A

Relating to Certification of Vapor Recovery Systems

**Modification of the Operative and Effective Dates Relating to the Finding
that Phase II Enhanced Vapor Recovery (EVR) Systems and
In-Station Diagnostics (ISD) Are Not Certified for Use with Gasoline
Dispensing Facilities where Underground Gasoline Storage Systems Serve
as Bulk Plants (*Gasoline Dispensing Facilities at Bulk Plants*)**

WHEREAS, the California Air Resources Board (ARB) has established, pursuant to California Health and Safety Code Sections 25290.1.2, 39600, 39601 and 41954, certification procedures for systems designed for the control of gasoline vapor emissions during motor vehicle fueling operations (Phase II EVR systems and ISD) in its Certification Procedure for Vapor Recovery Systems at Gasoline Dispensing Facilities (CP-201) as last amended January 9, 2013, incorporated by reference in Title 17, California Code of Regulations, Section 94011;

WHEREAS, ARB has established, pursuant to California Health and Safety Code Sections 39600, 39601, 39607, and 41954, certification procedures for systems designed for the control of gasoline vapor emissions during gasoline transfers between bulk plants and cargo tanks in its Certification Procedure for Vapor Recovery Systems of Bulk Plants (CP-202) as last amended March 17, 1999, incorporated by reference in Title 17, California Code of Regulations, Section 94012;

WHEREAS, ARB has determined, after consulting with industry and local Air Pollution Control Districts/Air Quality Management Districts, that there are a number of *Gasoline Dispensing Facilities at Bulk Plants* as each of those terms are defined in its Definitions for Vapor Recovery Procedures (D-200) as last amended on January 9, 2013, incorporated by reference in Title 17, California Code of Regulations, Section 94010;

WHEREAS, *Gasoline Dispensing Facilities at Bulk Plants* are subject to the performance standards specified in CP-201, which includes the Phase II EVR standards and ISD, for the portion of the facilities that fuels motor vehicles;

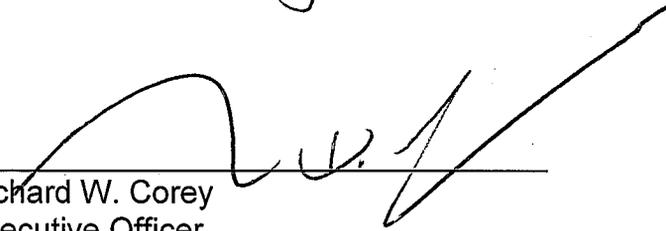

WHEREAS, Section 2.4.4 of CP-201 allows the Executive Officer to change the operative and effective dates of new performance standards and specifications when Phase II EVR systems and ISD meeting the applicable standards and specifications are not certified by the operative dates specified in Table 2-1 of CP-201; and

WHEREAS, a vapor recovery system that meets the Phase II EVR standards and specifications and ISD were not certified for use on *Gasoline Dispensing Facilities at Bulk Plants* by the operative date in Table 2-1 of CP-201.

NOW, THEREFORE, IT IS ORDERED that *Gasoline Dispensing Facilities at Bulk Plants* shall continue to operate or be installed with vapor recovery systems that have been certified by ARB prior to the operative dates specified in CP-201 Table 2-1 until such time that ARB certifies a Phase II EVR system for use on *Gasoline Dispensing Facilities at Bulk Plants*.

IT IS FURTHER ORDERED that *Gasoline Dispensing Facilities at Bulk Plants* existing as of the date the first compatible vapor recovery system that meets the Phase II EVR standards and specifications including ISD is certified shall have four years from that date to comply with the performance standards and specifications required by CP-201.

Executed at Sacramento, California, this 24th day of February 2015.

Richard W. Corey
Executive Officer
