WHEREAS, the California Air Resources Board (ARB) has established, pursuant to California Health and Safety Code sections 25290.1.2, 39600, 39601 and 41954, certification procedures for systems designed for the control of gasoline vapor emissions during motor vehicle fueling operations (Phase II EVR vapor recovery systems) in its CP-201, *Certification Procedure for Vapor Recovery Systems at Gasoline Dispensing Facilities* (Certification Procedure) as last amended May 25, 2006, incorporated by reference in title 17, California Code of Regulations, section 94011;

WHEREAS, ARB has established, pursuant to California Health and Safety Code sections 39600, 39601, 39607, and 41954, test procedures for determining the compliance of Phase II vapor recovery systems with emission standards;

WHEREAS, Franklin Fueling Systems, Inc. (FFS) requested certification of the Healy Phase II Enhanced Vapor Recovery (EVR) System Not Including In-Station Diagnostics (ISD) (Healy Phase II EVR System) pursuant to the Certification Procedure on April 8, 2005 by Executive Order VR-201-A, and last modified on December 10, 2009, by Executive Order VR-201-L;

WHEREAS, the Certification Procedure provides that ARB Executive Officer shall issue an Executive Order if he or she determines that the vapor recovery system conforms to all of the applicable requirements set forth in the Certification Procedure;

WHEREAS, G-01-032 delegates to the Chief of the Monitoring and Laboratory Division the authority to certify or approve modifications to certified Phase I and Phase II vapor recovery systems for gasoline dispensing facilities; and

WHEREAS, I, Alberto Ayala, Chief of the Monitoring and Laboratory Division, find that the Healy Phase II EVR System, conforms with all requirements set forth in the Certification Procedure, including compatibility when fueling vehicles equipped with onboard refueling vapor recovery systems, and results in a vapor recovery system which is at least 95.0 percent efficient and does not exceed 0.38 pounds of hydrocarbons per 1,000 gallons of gasoline transferred when tested pursuant to TP-201.2, *Efficiency and Emission Factor for Phase II Systems* (May 2, 2008).
NOW, THEREFORE, IT IS HEREBY ORDERED that the Healy Phase II EVR System is certified to be at least 95 percent efficient and does not exceed 0.38 pounds of hydrocarbon per 1,000 gallons of gasoline transferred in attended and/or self-service mode when used with an ARB-certified Phase I vapor recovery system installed, operated, and maintained as specified herein and in the following exhibits. Exhibit 1 contains a list of the equipment certified for use with the Healy Phase II EVR System. Exhibit 2 contains the performance standards, specifications, typical installation drawings and maintenance intervals applicable to the Healy Phase II EVR System as installed in a gasoline dispensing facility (GDF). Exhibit 3 contains the manufacturing specifications. Exhibit 4 is the test procedure for verifying performance of the Healy Clean Air Separator. Exhibit 5 is the vapor to liquid ratio test procedure for verifying performance of the Healy 900 Nozzle. Exhibit 6 is the Healy Phase II EVR System Limited Warranty. Exhibit 7 is the nozzle bag test procedure. Exhibit 8 provides items required in conducting TP-201.3. Exhibit 9 is the procedure for verifying performance of the Liquid Condensate Trap.

IT IS FURTHER ORDERED that compliance with the applicable certification requirements, rules and regulations of the Division of Measurement Standards of the Department of Food and Agriculture, the Office of the State Fire Marshal of the Department of Forestry and Fire Protection, the Division of Occupational Safety and Health of the Department of Industrial Relations, and the Division of Water Quality of the State Water Resources Control Board are made conditions of this certification.

IT IS FURTHER ORDERED that FFS shall provide a warranty for the vapor recovery system and components to the initial purchaser. The warranty shall be passed on to each subsequent purchaser within the warranty period. The manufacturer of components listed in Exhibit 1 not manufactured by Healy Systems, Inc. shall provide a warranty to each of their components certified herein. The warranty shall include the ongoing compliance with all applicable performance standards and specifications and shall comply with all warranty requirements in Section 16.5 of the Certification Procedure. FFS or other manufacturers may specify that the warranty is contingent upon the use of trained installers.

IT IS FURTHER ORDERED that every certified component manufactured by FFS shall be performance tested by the manufacturer as provided in Exhibit 3.

IT IS FURTHER ORDERED that the certified Healy Phase II EVR System shall be installed, operated, and maintained in accordance with the ARB Approved Installation, Operation, and Maintenance Manual. A copy of this Executive Order and the ARB Approved Installation, Operation and Maintenance Manual shall be maintained at each GDF where a certified Healy Phase II EVR System is installed.
IT IS FURTHER ORDERED that equipment listed in Exhibit 1, unless exempted, shall be clearly identified by a permanent identification showing the manufacturer’s name and model number.

IT IS FURTHER ORDERED that any alteration in the equipment parts, design, installation, or operation of the system certified hereby is prohibited and deemed inconsistent with this certification, unless the alteration has been submitted in writing and approved in writing by the Executive Officer or Executive Officer delegate.

IT IS FURTHER ORDERED that the following requirements are made a condition of certification. The owner or operator of the Healy Phase II EVR System shall conduct and pass the following tests no later than 60 days after startup and at least once in each 12 month period, using the following test procedures:

- TP-201.3, *Determination of 2 Inch WC Static Pressure Performance of Vapor Recovery Systems of Dispensing Facilities* (March 17, 1999);
- Exhibit 8, *Required Items in Conducting TP-201.3*;
- Exhibit 4, *Determination of Static Pressure Performance of the Healy Clean Air Separator*;
- Exhibit 5, *Vapor to Liquid Volume Ratio*; and
- Exhibit 9, *Liquid Condensate Trap Compliance Test Procedure* (if applicable).

Local District at their option may specify the testing frequency and related sequencing of the above tests. Notification of testing, and submittal of test results, shall be done in accordance with local district requirements and pursuant to policies established by that district. Local districts may require the use of alternate test form(s), provided they include the same minimum parameters identified in the datasheet referenced in the test procedure(s). Alternative test procedures, including most recent versions of the test procedures listed above, may be used if determined by ARB Executive Officer or Executive Officer delegate, in writing, to yield equivalent results.

IT IS FURTHER ORDERED that the following requirements are made a condition of certification. The owner or operator of the Healy Phase II EVR System shall conduct, and pass, the following tests no later than 60 days after startup using Exhibit 7, *Nozzle Bag Test Procedure*. TP-201.4, *Dynamic Back Pressure* (July 3, 2002) shall be conducted in accordance with the conditions listed in item 1 of the Vapor Recovery Piping Configurations section of Exhibit 2. Local districts have the authority to require conducting of Exhibit 5, *Vapor to Liquid Volume Ratio*, in lieu of TP-201.4, *Dynamic Back Pressure* (July 3, 2002) provided that at least 2 gallons of product are introduced into the system through each dispenser riser prior to conducting the test. Notification of testing, and submittal of test results, shall be done in accordance with local district requirements and pursuant to the policies established by that district. Local districts may require the use of alternate test form(s), provided they include the same minimum parameters identified in the datasheet referenced in the test procedure(s). Alternative test procedures, including most recent versions of the test procedures listed above, may
be used if determined by ARB Executive Officer or Executive Officer delegate, in writing, to yield equivalent results.

IT IS FURTHER ORDERED that, except as provided above, local districts at their option will specify the testing, related sequencing, and testing frequency of the nozzle vapor valves. If nozzle vapor valve tests are required by the district, the test shall be conducted in accordance with Exhibit 7, Nozzle Bag Test Procedure.

IT IS FURTHER ORDERED that the Healy Phase II EVR System shall be compatible with gasoline in common use in California at the time of certification. The Healy Phase II EVR System is not compatible with gasoline containing more than 15 percent methanol, 15 percent ethanol, or 15 percent methyl tertiary butyl ether (MTBE). Any modifications to comply with future California gasoline requirements shall be approved in writing by the Executive Officer or Executive Officer delegate.

IT IS FURTHER ORDERED that the certification of the Healy Phase II EVR System is valid through September 1, 2011 to provide more time for the Executive Officer or Executive Officer delegate to gather and evaluate information.

IT IS FURTHER ORDERED that Executive Order VR-201-L issued on December 10, 2009, is hereby superseded by this Executive Order. Healy Phase II EVR Systems certified under Executive Order VR-201-A through L may remain in use at existing installations. This Executive Order shall apply to new installations or major modification of Phase II Systems with a throughput of less than or equal to 600,000 gallons per year. A new installation or a major modification at a GDF with a throughput of more than 600,000 gallons per year is not authorized.

Executed at Sacramento, California, this 23rd day of July 2010.
