(VST Phase II EVR System Including
Veeder-Root In-Station Diagnostic (ISD) System)

NOTICE:

The **ARB Approved Installation, Operation and Maintenance Manual (IOM) for VR-203 and VR-204** describes the tools, methods, and skill levels required to install the **VST Phase II EVR System and the VST Phase II EVR System, including Veeder-Root ISD.**

Unless specified in Executive Order VR-204-A or this IOM, only skilled technicians that are trained, certified, and licensed by VST, Inc. (i.e. VST Authorized Service Contractors) are able to perform installation, maintenance, or repairs of components manufactured by VST Inc. or the warranty will be void. Unless specified otherwise, only skilled technicians that are trained, certified, and licensed by the Veeder-Root Company are able to perform installation, maintenance, or repairs of components manufactured by the Veeder-Root Company or the warranty will be void.

It is the responsibility of each VST Authorized Service Contractor (ASC) and/or each Veeder-Root technician to be familiar with the current requirements of state, federal, and local codes for installation and repair of gasoline dispensing equipment.

It is also the responsibility of the VST ASC and/or the Veeder-Root technician to be aware of all the manuals, necessary safety precautions, and site safety requirements to assure a safe and trouble-free installation.

To participate in a VST training class, a candidate will need to complete an enrollment form, which can be downloaded from the VST website at www.vsthose.com or requested by phone at 937-704-9333. Once the enrollment form is approved by VST, the candidate can enroll in a VST training class. A schedule of classes is also available on the above VST website.

To confirm a VST Authorized Service Contractor status, a regulator can go to the VST website at www.vsthose.com. This list is updated periodically.
